

AMY GILL

I am an aspiring biomedical data scientist and quantitative biology educator. My career goals are to advance personalized cancer therapy with data-driven systems biology and improve quantitative biology education resources. I currently seek a doctoral program to enhance my bioinformatics and quantitative biology skills and perform patient-centered research.

EDUCATION

2016
|
2015

M.A.T., Secondary Education - Biology

National-Louis University

📍 Chicago, IL

- Professional Educator License (IL), Biology/Chemistry endorsements

2015
|
2011

M.S., Cancer Biology

University of Chicago

📍 Chicago, IL

- Bernice Goldblatt Scholar, Cancer Research Foundation
- Honored Graduate Student, University of Chicago Women's Board

2011
|
2007

B.A., Biological Sciences, Chemistry

University of Chicago

📍 Chicago, IL

- General Honors; Specialization in Endocrinology; Dean's List 4 years

RESEARCH EXPERIENCE

2019
|
2017

Pathology Research Technician

Dana-Farber Cancer Institute

📍 Boston, MA

- Developed and analyzed custom mouse models of chronic lymphocytic leukemia (CLL) in the Wu laboratory.
- Produced high-titer CRISPR-Cas9 lentivirus. Purified and transduced HSCs for transplant into immunodeficient mice.
- Developed and executed flow cytometry protocols to classify B cell lineages, track CLL progression, enrich for HSCs, and distinguish donor and recipient cells via the CD45 system.

2017
|
2016

Research Technician

University of Chicago

📍 Chicago, IL

- Studied zebrafish development to investigate the homology between fish fins and tetrapod digits in the Shubin lab.
- Performed summer and weekend (part-time) zebrafish husbandry and genotyping of CRISPR-generated Hoxa13a/Hoxa13b double mutant fish.

📞 (847) 477-3100

in [linkedin.com/in/amy-gill-29693244/](https://www.linkedin.com/in/amy-gill-29693244/)

SKILLS

💻 **Programming:** R, Bioconductor, bookdown, Python, GitHub

🧪 **Laboratory:** Cell culture, western blot, genotyping, qRT-PCR, primer design, flow cytometry, transfection, lentivirus production, mouse husbandry, zebrafish husbandry

🔗 **Other:** Science teaching, science writing, data analysis, data visualization, statistics, experimental design

Made with the R package [pagedown](#).

The source code is available at github.com/gillsignals/cv.

Last updated on 2019-11-11.

2014
|
2011

Graduate Research Assistant

University of Chicago

📍 Chicago, IL

- Investigated the role of Blimp1 (PRDM1) in radiogenic stress response to analyze its role in protection from radiogenic breast cancer in the Onel/Cunningham lab.
- Demonstrated that Blimp1 primary transcript, mRNA and protein expression increase after IR exposure; designed Blimp1 shRNAs and inducible overexpression vectors and transduced cell lines.
- Performed proteomic analysis of cytarabine chemotherapy response in lymphoblastoid cells using microwestern arrays (MWAs) in the Jones lab.

2011
|
2007

Undergraduate Researcher

University of Chicago

📍 Chicago, IL

- Studied the cellular uptake of VO(acac)₂ to analyze its application as a contrast agent in PET scans in the Makinen lab. Demonstrated that VO(acac)₂ enters the cell via the reduced folate carrier (RFC) protein using Western blots and RFC inhibitors.
- Analyzed epigenetic differences in high-risk versus low-risk neuroblastoma cell lines and tumors with bisulfite sequencing in the Cohn lab.

TEACHING EXPERIENCE

2020
|
2019

Lead Content Developer, Data Science Professional Program

HarvardX

📍 Cambridge, MA

- Maintain, revise and expand online content for the Data Science and Genomic Data Science MOOC series from HarvardX on edX, including dozens of new coding exercises.
- Added a variety of new data sets and case studies to the course dslabs package for teaching data science in R, comprehensively edited the Introduction to Data Science textbook, and am co-authoring the solution guide.

2017
|
2016

Science Lab Coordinator

Adlai E. Stevenson High School

📍 Lincolnshire, IL

- Prepared laboratory chemicals and materials, tested and improved protocols, and maintained laboratory equipment for 49 high school science teachers with 4000+ students.
- Updated labs to incorporate modern scientific techniques, probeware, and inquiry-based principles into the high school curriculum.
- Was a private and homebound student tutor for biology, chemistry, and anatomy and physiology.

2017
|
2016

Science REACH Co-sponsor and WYSE/TEAMS Sponsor

Adlai E. Stevenson High School

📍 Lincolnshire, IL

- Helped ~80 students design, perform and present research projects for Illinois Junior Academy of Sciences and national science fairs.
- Led ~70 students in training for STEM competitions.
- Received the Ambassador Award for guiding students to top 5 state (WYSE) and top 10 national (TEAMS) performances.

- 2016 **Biology Student Teacher**  Hoffman Estates, IL
Conant High School
- Instructed ~140 grade 9 students in 3 sections of honors biology and 2 sections of general biology.
 - Promoted accessible student-centered learning with labs, activities and engaging technology for multiple learning styles.
- 2014 | 2009 **Teaching Assistant**  Chicago, IL
University of Chicago
- Assisted with numerous undergraduate and 1st year PhD graduate courses.
 - Prepared and taught weekly review sessions and exam preparation sessions, helped write exams, graded assignments and exams, fielded student questions, held office hours, and tutored students 1:1.
 - Courses: Endocrinology/Cell Signaling (4x), Biological Systems, Protein Fundamentals, and Cancer Biology Grant Writing

PEER-REVIEWED PUBLICATIONS

- 2018 **Splicing modulation sensitizes chronic lymphocytic leukemia cells to venetoclax by remodeling mitochondrial apoptotic dependencies**
Ten Hacken E et al., JCI Insight 3(19). PMID 30282833.
- 2017 **Identification of Novel Protein Expression Changes Following Cisplatin Treatment and Application to Combination Therapy**
Stark AL et al. Journal of Proteome Research, 16(11): 4227-4236. PMID 28902521.
- 2012 **Truncated DNMT3B isoform DNMT3B7 suppresses growth, induces differentiation, and alters DNA methylation in human neuroblastoma.**
Ostler KR et al. Cancer Research 72(18): 4714-23.

POSTERS AND PRESENTATIONS

- 2014 **The role of PRDM1 in protection against radiogenic breast cancer.**
Oral presentation, Dept. Pediatric Hem/Onc.  University of Chicago
- 2014 **The role of Blimp1 in protection against ionizing radiation in breast cells.**
Poster, Biomedical Sciences Retreat  University of Chicago
- 2013 **Systems analysis of cytarabine response and resistance in hematopoietic cells.**
Poster, Biomedical Sciences Retreat  University of Chicago

SELECTED SCIENCE WRITING

2019	More datasets for teaching data science: The expanded dslabs package Simply Statistics Blog (guest post)	
2019	Prediction of breast cancer from nuclear features of fine needle aspirate biopsies Capstone project for the HarvardX Data Science Professional Certificate.	📍 HarvardX, edX
2013	Cellular and molecular characterization of Blimp1 activation in response to ionizing radiation and its relevance to radiogenic breast cancer Thesis proposal	📍 University of Chicago
2012	HBP1 promotes neuroblastoma differentiation by inhibiting MYCN transcription factor activity Qualifying exam	📍 University of Chicago

PROGRAMMING AND QUANTITATIVE COURSES

2019	Mathematics for Machine Learning: Linear Algebra Imperial College London	📍 Coursera
2019 2018	Data Science Professional Certificate HarvardX	📍 edX
2019 2018	Genomic Data Science (7/8 courses) Johns Hopkins University	📍 Coursera
2018	Quantitative Biology Workshop MITx	📍 edX
